Professional Summary

L&D leader who grew from a frontline Trainer into Global L&D Manager, promoted in December 2025, and who has stayed hands-on in instructional design and front-end enablement, working the full ADDIE cycle from needs analysis through curriculum development to evaluation. At 14West / The Contact Center I administer LearnUpon and KnowledgeOwl, and I led the integration of KnowledgeOwl content into Talkdesk's AI Copilot. I also design and build the browser-based decision trees and the custom CSS component library now running in production, while still designing and delivering blended learning programs — live, virtual, and self-paced — across the United States, Ireland, and the Philippines.

Experience

Global L&D Manager

December 2025 – Present

14West / The Contact Center (TCC)

Remote

Promoted to lead the training function and a team of trainers, while continuing to own learning systems, knowledge management, and the tools behind them.

- Manage a team of trainers: scheduling, development, performance reviews, and a train-the-trainer program built on onboarding plans, scorecards, and mentoring.
- Own stakeholder management across clients, operations leadership, QA, and senior leadership, partnering on training strategy and operational readiness.
- Own global L&D strategy across learning systems, knowledge management, and trainer development for a distributed organization.

Trainer → Learning & Development

October 2020 – December 2025

14West / The Contact Center (TCC)

Baltimore, MD / Remote

Hired as a Trainer and progressively expanded the role into learning systems, knowledge management, and front-end / technical enablement for multiple publishing clients.

- Administer LearnUpon, KnowledgeOwl, and Talkdesk Copilot, including user management, course builds and SCORM packages, certification paths, and reporting.
- Designed and deployed a modular CSS component library for KnowledgeOwl, improving the scannability and consistency of frontline operational guidance.
- Led the integration of KnowledgeOwl content into Talkdesk Copilot, building tagging, intent, and metadata structures to improve AI-assisted search results.
- Built SharePoint onboarding hubs, Power Automate workflows, and browser-based decision trees to improve coordination and self-service access.
- Deliver blended onboarding, upskilling, and soft-skills programs — classroom ILT and virtual instructor-led training (vILT) — for agents and managers across operations in the United States, Ireland, and the Philippines.
- Maintain learner satisfaction above 4.5+/5 across all programs and 90%+ first-time pass rates on new-hire certifications, evaluated at Kirkpatrick Levels 1-2 through standardized post-training surveys and certification assessments.
- Support 8+ client programs and have led onboarding for three clients, including a six-week Philippines call-center (BPO) launch in October 2022.
- Partnered with IT to move training and knowledge request intake from Airtable into Jira forms for knowledge-base updates, ILT requests, and e-learning work.
- Created and transitioned company-wide recertification programs, including SOP development, documentation management, and change enablement.

Front End Assistant Manager

August 2018 – July 2020

Caraluzzi's Market

Newtown, CT

Supervised a 40-person front-end team and managed new-hire onboarding, service training, scheduling, cash handling, and operational compliance.
